Teflon power

By Elise L. Moore, C.S.B.

Our church had a booth where we were presenting Christian Science at a women's exposition and we were trying to get the sign up right before the opening, but the adhesive had baked on to the back of the sign. And I was trying everything, razor blades, everything, and nothing was working. The designer came over and saw what was going on and he said to me "there is no false attraction." And I began thinking about that - there's no false attraction. What that meant to me was good isn't attracted to evil, honesty isn't attracted to dishonesty. And, within moments, the adhesive had let go and we got the sign up.

I've continued to think about that, that there is no attraction to anything negative. Actually our thought, when we fill our thought with spiritual ideas from God, it acts like Teflon. And any evil or any negative thinking has nothing to stick to. So why don't we think about that today. That our thought, our spiritual thought from God, is like Teflon and that no negative thinking can stick to it.
